SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name : Diborane
SDS no : 040
Chemical description : Diborane
CAS-No. : 19287-45-7
EC-No. : 242-940-6
EC Index-No. : ---
Registration-No. : Registration deadline not expired.
Chemical formula : B2H6

1.2. Relevant identified uses of the substance or mixture and uses advised against

Relevant identified uses : Industrial and professional. Perform risk assessment prior to use.
Use for manufacture of electronic/photovoltaic components. Contact supplier for more information on uses.
Uses advised against : Consumer use.

1.3. Details of the supplier of the safety data sheet

Company identification

Supplier
AIR LIQUIDE Deutschland GmbH
Luise-Rainer-Straße 5
40235 Düsseldorf - GERMANY
T +49 (0)211 6699-0 - F +49 (0)211 6699-222
info@airliquide.de

E-Mail address (competent person) : info.SDB@airliquide.de

1.4. Emergency telephone number

Emergency telephone number : +49 (0)2151 398668
Availability ( 24 / 7 )

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP]

Physical hazards
- Flammable gases, Category 1 : H220
- Gases under pressure : liquefied gas : H280

Health hazards
- Acute toxicity (inhalation: gas) : Category 1 : H330

2.2. Label elements

Labelling according to Regulation (EC) No. 1272/2008 [CLP]

Hazard pictograms (CLP) :

GHS02  GHS04  GHS06

Signal word (CLP) : Danger

Hazard statements (CLP) :
- H220 - Extremely flammable gas..
- H280 - Contains gas under pressure; may explode if heated..
- H330 - Fatal if inhaled..

Precautionary statements (CLP) :
- Prevention : P260 - Do not breathe gas, vapours.
P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No
Diborane

2.3. Other hazards

- Contact with liquid may cause cold burns/frostbite.
- May ignite spontaneously in contact with air.

SECTION 3: Composition/information on ingredients

3.1. Substances

<table>
<thead>
<tr>
<th>Name</th>
<th>Product identifier</th>
<th>Composition [V-%]:</th>
<th>Classification according to Regulation (EC) No. 1272/2008 [CLP]</th>
</tr>
</thead>
<tbody>
<tr>
<td>Diborane</td>
<td>(CAS-No.) 19287-45-7 (EC-No.) 242-940-6 (EC Index-No.) --- (Registration-No.) *2</td>
<td>100</td>
<td>Flam. Gas 1, H220 Press. Gas (Liq.), H280 Acute Tox. 1 (Inhalation:gas), H330</td>
</tr>
</tbody>
</table>

Contains no other components or impurities which will influence the classification of the product.

*1: Listed in Annex IV / V REACH, exempted from registration.
*2: Registration deadline not expired.
*3: Registration not required: Substance manufactured or imported < 1t/y.

3.2. Mixtures : Not applicable.

SECTION 4: First aid measures

4.1. Description of first aid measures

- Inhalation : Remove victim to uncontaminated area wearing self contained breathing apparatus. Keep victim warm and rested. Call a doctor. Apply artificial respiration if breathing stopped.
- Skin contact : In case of frostbite spray with water for at least 15 minutes. Apply a sterile dressing. Obtain medical assistance.
- Eye contact : Immediately flush eyes thoroughly with water for at least 15 minutes.
- Ingestion : Ingestion is not considered a potential route of exposure.

4.2. Most important symptoms and effects, both acute and delayed

: Delayed adverse effects possible.
: Refer to section 11.

4.3. Indication of any immediate medical attention and special treatment needed

: Obtain medical assistance.

SECTION 5: Firefighting measures

5.1. Extinguishing media

- Suitable extinguishing media : Water spray or fog.
  : Dry powder.
  : Shutting off the source of the gas is the preferred method of control.
- Unsuitable extinguishing media : Carbon dioxide.
  : Do not use water jet to extinguish.
5.2. Special hazards arising from the substance or mixture

Specific hazards:
- Exposure to fire may cause containers to rupture/explode.
- Escaping gas cannot be extinguished.

Hazardous combustion products:
- None that are more hazardous than the product itself.

5.3. Advice for firefighters

Specific methods:
- Use fire control measures appropriate for the surrounding fire. Exposure to fire and heat radiation may cause gas receptacles to rupture. Cool endangered receptacles with water spray jet from a protected position. Prevent water used in emergency cases from entering sewers and drainage systems.
- If possible, stop flow of product.
- Use water spray or fog to knock down fire fumes if possible.
- Do not extinguish a leaking gas flame unless absolutely necessary. Spontaneous/explosive re-ignition may occur. Extinguish any other fire.
- Move containers away from the fire area if this can be done without risk.

Special protective equipment for fire fighters:
- Wear gas tight chemically protective clothing in combination with self contained breathing apparatus.
- Standard EN 943-2: Protective clothing against liquid and gaseous chemicals, aerosols and solid particles. Gas-tight chemical protective suits for emergency teams.
- Standard EN 137 - Self-contained open-circuit compressed air breathing apparatus with full face mask.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

- Try to stop release.
- Evacuate area.
- Monitor concentration of released product.
- Consider the risk of potentially explosive atmospheres.
- Wear self-contained breathing apparatus when entering area unless atmosphere is proved to be safe.
- Eliminate ignition sources.
- Ensure adequate air ventilation.
- Act in accordance with local emergency plan.
- Stay upwind.

6.2. Environmental precautions

- Try to stop release.

6.3. Methods and material for containment and cleaning up

- Keep area evacuated and free from ignition sources until any spilled liquid has evaporated (ground free from frost).

6.4. Reference to other sections

- See also sections 8 and 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Safe use of the product:
- Gas cabinets, rooms or indoor areas where product is stored or used shall be protected by an automatic sprinkler system.
- The product must be handled in accordance with good industrial hygiene and safety procedures.
- Only experienced and properly instructed persons should handle gases under pressure.
- Consider pressure relief device(s) in gas installations.
- Ensure the complete gas system was (or is regularly) checked for leaks before use.
- Do not smoke while handling product.
- Avoid exposure, obtain special instructions before use.
- Use only properly specified equipment which is suitable for this product, its supply pressure and
temperature. Contact your gas supplier if in doubt.
Installation of a cross purge assembly between the cylinder and the regulator is recommended.
Avoid suck back of water, acid and alkalis.
Assess the risk of potentially explosive atmospheres and the need for explosion-proof equipment.
Purge air from system before introducing gas.
Take precautionary measures against static discharge.
Keep away from ignition sources (including static discharges).
Consider the use of only non-sparking tools.
Do not breathe gas.
Avoid release of product into atmosphere.
Ensure equipment is adequately earthed.

Safe handling of the gas receptacle:
Refer to supplier's container handling instructions.
Do not allow backfeed into the container.
Protect cylinders from physical damage; do not drag, roll, slide or drop.
When moving cylinders, even for short distances, use a cart (trolley, hand truck, etc.) designed to transport cylinders.
Leave valve protection caps in place until the container has been secured against either a wall or bench or placed in a container stand and is ready for use.
If user experiences any difficulty operating cylinder valve discontinue use and contact supplier.
Never attempt to repair or modify container valves or safety relief devices.
Damaged valves should be reported immediately to the supplier.
Keep container valve outlets clean and free from contaminants particularly oil and water.
Replace valve outlet caps or plugs and container caps where supplied as soon as container is disconnected from equipment.
Close container valve after each use and when empty, even if still connected to equipment.
Never attempt to transfer gases from one cylinder/container to another.
Never use direct flame or electrical heating devices to raise the pressure of a container.
Do not remove or deface labels provided by the supplier for the identification of the cylinder contents.
Suck back of water into the container must be prevented.
Open valve slowly to avoid pressure shock.

7.2. Conditions for safe storage, including any incompatibilities:
Observe all regulations and local requirements regarding storage of containers.
Containers should not be stored in conditions likely to encourage corrosion.
Container valve guards or caps should be in place.
Containers should be stored in the vertical position and properly secured to prevent them from falling over.
Stored containers should be periodically checked for general condition and leakage.
Keep container below 50°C in a well ventilated place.
Store containers in location free from fire risk and away from sources of heat and ignition.

7.3. Specific end use(s):
None.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

<table>
<thead>
<tr>
<th>Diborane (19287-45-7)</th>
<th>OEL : Occupational Exposure Limits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>TWA (DE) OEL 8h [mg/m³] TRGS 900</td>
</tr>
<tr>
<td></td>
<td>TWA (DE) OEL 8h [ppm] TRGS 900</td>
</tr>
<tr>
<td></td>
<td>Peak exposure limitation factor (DE) OEL TRGS 900</td>
</tr>
</tbody>
</table>
8.2. Exposure controls

8.2.1. Appropriate engineering controls

: Product to be handled in a closed system and under strictly controlled conditions.
  Provide adequate general and local exhaust ventilation.
  Preferably use permanent leak-tight installations (e.g. welded pipes).
  Systems under pressure should be regularly checked for leakages.
  Ensure exposure is below occupational exposure limits (where available).
  Gas detectors should be used when toxic gases may be released.
  Consider the use of a work permit system e.g. for maintenance activities.

8.2.2. Individual protection measures, e.g. personal protective equipment

: A risk assessment should be conducted and documented in each work area to assess the risks related to the use of the product and to select the PPE that matches the relevant risk. The following recommendations should be considered:
  PPE compliant to the recommended EN/ISO standards should be selected.

• Eye/face protection
  Wear goggles when transfilling or breaking transfer connections.
  Standard EN 166 - Personal eye-protection - specifications.

• Skin protection
  - Hand protection
    Wear working gloves when handling gas containers.
    Standard EN 388 - Protective gloves against mechanical risk.
    Wear cold insulating gloves when transfilling or breaking transfer connections.
    Standard EN 511 - Cold insulating gloves.
  - Other
    Consider the use of flame resistant anti-static safety clothing.
    Standard EN ISO 1149-5 - Protective clothing: Electrostatic properties.
    Wear safety shoes while handling containers.
    Standard EN ISO 20345 - Personal protective equipment - Safety footwear.

• Respiratory protection
  Gas filters may be used if all surrounding conditions e.g. type and concentration of the contaminant(s) and duration of use are known.
  Use gas filters with full face mask, where exposure limits may be exceeded for a short-term period, e.g. connecting or disconnecting containers.
  Recommended: Filter B (grey).
  Gas filters do not protect against oxygen deficiency.
  Standard EN 14387 - Gas filter(s), combined filter(s) and full face mask - EN 136.
  Keep self contained breathing apparatus readily available for emergency use.
  Self contained breathing apparatus is recommended, where unknown exposure may be expected, e.g. during maintenance activities on installation systems.
  Standard EN 137 - Self-contained open-circuit compressed air breathing apparatus with full face mask.

• Thermal hazards
  None in addition to the above sections.

8.2.3. Environmental exposure controls

: Refer to local regulations for restriction of emissions to the atmosphere. See section 13 for specific methods for waste gas treatment.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance
- Physical state at 20°C / 101.3kPa: Gas.
- Colour: Colourless.

Odour: Pungent. Poor warning properties at low concentrations.

Odour threshold: Odour threshold is subjective and inadequate to warn of overexposure.
Melting point : -165 °C
Boiling point : -92.5 °C
Flash point : Not applicable for gases and gas mixtures.
Flammability range : Pyrophoric.
Relative vapour density at 20 °C : Not applicable.
Evaporation rate (ether=1) : Not applicable for gases and gas mixtures.
Vapour pressure [20°C] : Not applicable.
Vapour pressure [50°C] : Not applicable.
Relative density, gas (air=1) : 0.965
Relative density, liquid (water=1) : 0.42
Solubility in water : No reliable data available.
pH value : Not applicable for gases and gas mixtures.
Partition coefficient n-octanol/water [log Kow] : Not applicable for inorganic gases.
Decomposition point [°C] : Not applicable.
Auto-ignition temperature : 38 °C
Viscosity [20°C] : No reliable data available.
Explosive Properties : Not applicable.
Oxidising Properties : Not applicable.

9.2. Other information
Molar mass : 27.7 g/mol
Critical temperature [°C] : 16.6 °C
Other data : Normally supplied only as a gaseous mixture component.

SECTION 10: Stability and reactivity

10.1. Reactivity
: No reactivity hazard other than the effects described in sub-sections below.

10.2. Chemical stability
: Stable under normal conditions.
: Can form higher boranes.

10.3. Possibility of hazardous reactions
: Can form explosive mixture with air.
: May react violently with oxidants.
: Can ignite spontaneously in air (fire cannot be put out). Can form spontaneous, violently explosive mixture in air.

10.4. Conditions to avoid
: Keep away from heat/sparks/open flames/hot surfaces. – No smoking.
: Avoid moisture in installation systems.

10.5. Incompatible materials
: Air, Oxidisers.
: For additional information on compatibility refer to ISO 11114.

10.6. Hazardous decomposition products
: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

SECTION 11: Toxicological information

11.1. Information on toxicological effects
Acute toxicity
: Fatal if inhaled.
: Delayed fatal pulmonary oedema possible.
### 12. Toxicity

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Contact supplier if guidance is required.

Do not discharge into areas where there is a risk of forming an explosive mixture with air.

Waste gas should be flared through a suitable burner with flash back arrestor.

Must not be discharged to atmosphere.

Toxic and corrosive gases formed during combustion should be scrubbed before discharge to atmosphere.

Ensure that the emission levels from local regulations or operating permits are not exceeded.

Refer to the EIGA code of practice Doc.30 "Disposal of Gases", downloadable at http://www.eiga.org for more guidance on suitable disposal methods.

Return unused product in original cylinder to supplier.

List of hazardous waste codes (from Commission Decision 2001/118/EC):

- 16 05 04 *: Gases in pressure containers (including halons) containing dangerous substances.

13.2. Additional information

External treatment and disposal of waste should comply with applicable local and/or national regulations.

SECTION 14: Transport information

14.1. UN number

UN-No. : 1911

14.2. UN proper shipping name

Transport by road/rail (ADR/RID) : DIBORANE

Transport by air (ICAO-TI / IATA-DGR) : Diborane

Transport by sea (IMDG) : DIBORANE

14.3. Transport hazard class(es)

Labelling:

- 2.3 : Toxic gases.
- 2.1 : Flammable gases.

Transport by road/rail (ADR/RID)

Class : 2.

Classification code : 2TF.

Tunnel Restriction : D - Passage forbidden through tunnels of category D and E.

Transport by sea (IMDG)

Class / Div. (Sub. risk(s)) : 2.3 (2.1)

Emergency Schedule (EmS) - Fire : F-D.

Emergency Schedule (EmS) - Spillage : S-U.

14.4. Packing group

Transport by road/rail (ADR/RID) : Not established.

Transport by air (ICAO-TI / IATA-DGR) : Not established.

Transport by sea (IMDG) : Not established.

14.5. Environmental hazards

Transport by road/rail (ADR/RID) : None.

Transport by air (ICAO-TI / IATA-DGR) : None.
Transport by sea (IMDG) : None.

14.6. Special precautions for user
Packing Instruction(s)
Transport by road/rail (ADR/RID) : P200.
Transport by air (ICAO-TI / IATA-DGR)
Passenger and Cargo Aircraft : Forbidden.
Cargo Aircraft only : Forbidden.
Transport by sea (IMDG) : P200.

Special transport precautions : Avoid transport on vehicles where the load space is not separated from the driver's compartment.
Ensure vehicle driver is aware of the potential hazards of the load and knows what to do in the event of an accident or an emergency.
Before transporting product containers:
- Ensure there is adequate ventilation.
- Ensure that containers are firmly secured.
- Ensure cylinder valve is closed and not leaking.
- Ensure valve outlet cap nut or plug (where provided) is correctly fitted.
- Ensure valve protection device (where provided) is correctly fitted.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code
: Not applicable.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU-Regulations
Restrictions on use : None.
Seveso Directive : 2012/18/EU (Seveso III) : Covered.

National regulations
National legislation : Ensure all national/local regulations are observed.

Germany
Water hazard class (WGK) : Water hazard class (WGK) 3, severe hazard to waters

15.2. Chemical safety assessment
A CSA has not yet been carried out.

SECTION 16: Other information

Abbreviations and acronyms : ATE - Acute Toxicity Estimate
CLP - Classification Labelling Packaging Regulation; Regulation (EC) No 1272/2008
EINECS - European Inventory of Existing Commercial Chemical Substances
CAS# - Chemical Abstract Service number
PPE - Personal Protection Equipment
Training advice: 
Ensure operators understand the flammability hazard.
Users of breathing apparatus must be trained.
Ensure operators understand the toxicity hazard.

Further information: 
This Safety Data Sheet has been established in accordance with the applicable European Union legislation.

Full text of H- and EUH-statements

DISCLAIMER OF LIABILITY: 
Before using this product in any new process or experiment, a thorough material compatibility and safety study should be carried out.
Details given in this document are believed to be correct at the time of going to press.
Whilst proper care has been taken in the preparation of this document, no liability for injury or damage resulting from its use can be accepted.
